## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-22 and 28, drawn to a facing material, classified in class 442, subclass 136.
  - II. Claims 23-27, drawn to a method for manufacturing a facing material, classified in class 427, subclass 206.
  - III. Claims 29-94, drawn to a solar cell module and method of making, classified in class 136, subclass 256.
2. The inventions are distinct, each from the other because of the following reasons:

The inventions of group I and group II are distinct from each other because the facing material claimed in group I can be made by a process different than the one claimed in group II. For example, the facing material does not need to be degassed.

The inventions of group I and group III are distinct from each other because group I relates to a facing material and group III claims a solar cell module. The solar cell module is distinct from the facing material because the solar cell module does not require the filler or waterproofing of the facing material and the facing material is clearly different from a solar cell module.

The inventions of group II and group III are distinct from each other because the claims of group II relate to a method for making a facing material and group III relates to

a solar cell module. These groups relate to divergent subject matter and are clearly distinct from one another.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
